## SUMMARY

Motivated 3rd-year Computer Science and Engineering student at Government Engineering College Sonbhadra, passionate about AI, Cloud Computing, and Open-Source Development. Skilled in applying theoretical knowledge to real-world challenges and eager to gain hands-on experience through internships. Committed to continuous learning, innovation, and effective team collaboration.

## EXPERIENCE

### Intern

Infosys Springboard 11/2025 - Present Remote (Virtual)  
Internship focused on AI Domain

- Gaining practical exposure to Artificial Intelligence, Machine Learning, and NLP using Python
- Worked on model development and deployment through real-world case studies

### Contributor

GirlScript Summer of Code (GSSoC) 10/2025 - Present Remote  
Open Source Contributor

- Contributing to open-source projects under the GSSoC program through code, documentation, and bug fixes
- Collaborating with maintainers and fellow contributors to enhance project functionality and community engagement

### Lead

CTC (Community for Technology and Coding) 08/2025 - Present  
REC, Sonbhadra  
Cloud Computing Lead

- Establishing the new Cloud Computing domain within the tech community
- Mentoring juniors on AWS, Google Cloud, and hands-on project deployment

### Student Participant / Team Lead

SIH & Other Technical Events

Participated in **SIH** and various internal & external hackathons

- Collaborated with peers and mentors in multiple hackathons to design and prototype tech-driven solutions.

### Educator

Umeed Foundation, Sonbhadra 05/2023 - 07/2024

Non-profit organization providing free education and mentorship to underprivileged students.

- Volunteering as an Educator under the Umeed Foundation to support free education for underprivileged students.

## EDUCATION

### Bachelor of Technology(Computer Science and Engineering)

Rajkiya Engineering College, Sonbhadra

08/2023 - Present GPA 8.30 / 10

### Senior Secondary (Intermediate)

Udit Narayan Inter College, Kushinagar

01/2020 - 12/2022

## PROJECTS

### 1.Online Payment Fraud Detection System | Python, Machine Learning

- Built an ML model to detect fraudulent transactions using data patterns and classification algorithms.
- Deployed the model with Flask for real-time prediction and user-friendly visualization.

### 2.Location Tracker | HTML, CSS, JavaScript, Google Maps API

- Developed a responsive web app to track and display live user location using GPS and Maps API integration.
- Implemented secure location sharing with real-time updates and clean UI design.

### 3.AI Chat Support Bot |Python, Flask, NLP

- Built an AI chatbot using NLP for real-time query handling.
- Integrated Flask backend with an interactive web interface.

### Skills:

- **Languages:** C++, Python, JavaScript, HTML/CSS
- **Frameworks & Libraries:** Flask, React.js, Pandas, NumPy, Scikit-learn, NLTK
- **Tools & Platforms:** Git, GitHub, Docker
- **Others:** Machine Learning, NLP, *Currently learning DSA*
- **Soft Skills:** Adaptability, Communication, Problem-Solving, Team Collaboration, Time Management
